

RONALD McDONALD HOUSE ADDITION

WILMINGTON, DELAWARE

This three-story, 30,000 square foot addition to the Ronald McDonald House of Delaware was full of challenges, requiring a high level of teamwork and coordination to ensure little or no disruption to this “home away from home” for families of children who are undergoing treatment for serious illnesses and diseases at area hospitals. The biggest challenge, however, was meeting the customer’s request to secure as much donated building material as possible to keep costs down for this non-profit. More than 20 companies participated in this successful effort. Now doubled in size, the house boasts 24 more bedrooms, family lounges, play areas, a dining room, kitchens, and such special features as a mini-theater and hair salon.
