To Whom It May Concern:

Our firm recently completed an addition and renovation project with SC&A construction at Wilmington Country Club. It was a pleasure for Chapman Coyle Chapman Associates to be part of the Owner/GC/A/E team on this project.

The existing clubhouse and golf course had to remain in operation during the course of the project. This required a general contractor that was well organized and but also flexible in working with the club to make adjustments during the course of the project to minimize disruptions to the club facilities. SC&A President Tom Cover, site Superintendent Dave Musacchio and the rest of the SC&A team demonstrated their expertise throughout the course of the project working with the club management staff closely to deliver the job successfully with as little disruption to club operations as possible.

Renovation projects are particularly challenging because numerous unforeseen conditions typically arise that require creative, cost effective solutions by the entire owner, general contractor & A/E team. SC&A's experience in assessing unforeseen conditions and recommending solutions to the team were critical to the success of the project. In addition, the project was constructed during a record snowfall season which required even more expertise and skill to keep the project moving during very difficult weather conditions.

The new and renovated spaces are now being enjoyed by the club members and Chapman Coyle Chapman Associates appreciates the leadership and professionalism provided by SC&A on this project. We hope to work with SC&A again in the future.

Best Regards,

Michael D. Beatty, AIA
