

## Concordville Fire Company

Glen Mills, PA

A complete renovation and three-room addition to this circa 1928 fire station improved its utility to the community and its dedicated volunteers. Emulating the 1928 façade and maintaining the station's usability during the process were primary objectives. Work included mechanical and electrical upgrades, a new sprinkler system, commercial kitchen, radio communications room, training room and much more.

## Longwood Fire Company

Kennett Square, PA

SC&A has had the privilege of serving our repeat customer, the Longwood Fire Company, over many years. Originally constructing a base facility in the 60s, we have been invited back several times since for additions, renovations and upgrades to meet with changes in technology and the growth of the station.
